

Single-disc

# SDH 5120

A shinier shine  
with no effort

## Full pad contact assures superior burnish

Productive

User friendly

Quiet

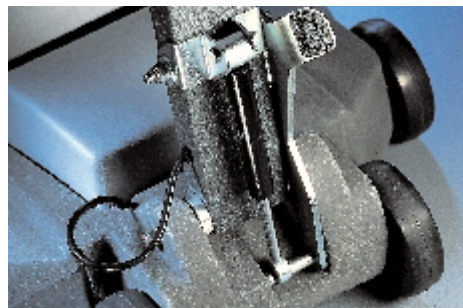

Easy to service

It doesn't take much »just a very light touch« and the SDH 5120 burnisher does the rest. Thanks to the Nilfisk floating pad, your hard floors will shine like never before. 2000 rpm add that extra sheen effortlessly and more productively. Are your floors uneven? It makes no difference to the SDH 5120. The patented floating pad driver "flattens out" dips and bulges.

Summing up its main benefits, this NILFISK:

- Offers active dust extraction system and an optional mounted spray system
- Adjusts pad pressure automatically, thanks to a patented automatic gas shock device
- Follows hard floor contours, because its direct-drive motor is flexible-mounted
- Easy for any operator to use, since there's no side-to-side torque to wrestle with
- Increases your productivity without straining your back or your budget
- Gives full pad contact on uneven floors, too

Pad pressure is automatically adjusted by a gas shock device, so the buffer pad always stays in full contact with the floor surface.

Burnishing can raise dust. The dust extraction solves the problem with a disposable filter and easily changed collector bag.

## Technical specifications

Voltage frequency	V/Hz	230/50	Cable length	m	23
Protection class (elec.)	-	II □	Dimension l x w x h	cm	81 x 63 x 124
Rating of brush motor	W	1100	Operating weight	kg	44
Pad diameter	cm	51	Noise level	dB(A)/20µPa	70
Pad speed	rpm	2000	Passive dust extraction device		Standard
Pad pressure		Automatically adjust
