**NO OBLIGATION
DEMONSTRATION**

The SC3000 is one of the most powerful single phase steam cleaners on the market today. It has all the power and capacity to meet

the most demanding industrial jobs. It produces steam at a pressure of 8 bar with enormous volume. Its 10 litre water reservoir gives it over 3 hours running time on one top up. It also has detergent injection to speed things up with enormous amounts of dirt, and has an enormous 23 Litre 1300 watt Vacuum to take care of it.

The SC3000 also has a Unique pressure water facility which is incredibly useful when a surface needs rinsing.

All our Steam Cleaners have **COPPER BOILERS** with **EXTERNAL HEATING ELEMENTS** which are not only **EXPLOSION PROOF** But means that in hard water areas they are **NOT AFFECTED BY LIME SCALE** Even when used for 8 hours per day lime scale is not a problem as they all have a patent method of cleaning out the boiler which takes Just 5 minutes a month

The SC 3000

The SC 3000 utilizes the latest steam technology and uses very little water with no harsh detergents, so providing maximum standards of cleaning and hygiene with Minimum

Rear view showing the enormous water and detergent reservoirs
